Fist of the north star live action imdb

If you've ever wanted to watch a film production embarrassing yourself royalty, check out *Fist Of The North Star*, a erroneous, completely awkward live action version of some of the supposed Japanese manga series. It's one of those painful people who doesn't translate into the realm of live action though, like the weird *Super Mario* movie they've made. Full of notable character actors, packed with steampunk-esque special effects, it may have worked with a different story, but the theatrical intensity and specific vibe of Oriental pop culture just don't come to life well on the Big Screen North America. It also has war with itself tonally: there's a light, PG *Power Rangers* feel in some places, but many scenes have graphic violence pushing a hard R rating into the deep end, which makes for a jarring experience. Gary Daniels plays Kenshiro, a solitary warrior who goes out to get Lord Shin (Costas Mandylor under a mess of an enemy fish), a brutal warlord who kills his father, briefly played by Malcolm McDowell. McDowell pulls a classic McDowell move, showing up in the flesh for about thirty seconds before disappearing and lazily lending his iconic voice to a talk skeleton version of his character later in the film. Don't ask me to remember more about the plot than that because it will involve a rewatch, and no one has time for that. Chris Penn is as fun as Jackal, an angry vagabond with a giant potato head and mental temperament to match. Watch for Dante 'Rufio' Basco, Downtown Julie Brown, Clint Howard, Mario Van Peebles and more in equally ridiculous getups. The only thing I can recommend here is the production design, lifted directly from some outstanding post-a apocalypse video games, it makes somewhat of an impression. The rest of the land with a giant thud and just sits there, doing not much of anything. 1 out of 1 finds this useful. Was this review helpful? Sign in to vote.
